

Solutions *Made Simple.*

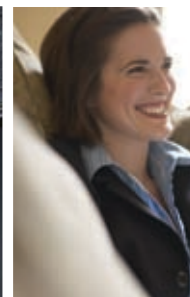

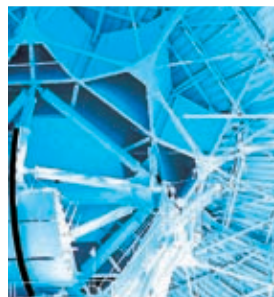

We Make Lodging Solutions *Simple.*

MDM Commercial Lodging is a complete solutions provider for guest-focused equipment in the lodging sector. Since 1990, we've equipped lodging customers throughout 50 states and the world—always with the same commitment to responsive service and worry-free project management. We specialize in TV systems, RF distribution, DIRECTV® high-definition/digital headend systems, complete project management and installation. We make sure every piece of equipment we sell functions efficiently and effectively as part of a whole.

- » Television equipment
- » Project management
- » Television Content

It's easy. With MDM Commercial Lodging, your equipment and content challenges are handled, so you can move on to getting the rest of your job done.

Complete Project Management.

MDM Commercial Lodging provides much more than just equipment. We provide comprehensive, cost-effective project management and consulting.

No matter what your challenge, and no matter what the needs of your facility, we have the solution to get the job done and reduce your worries.

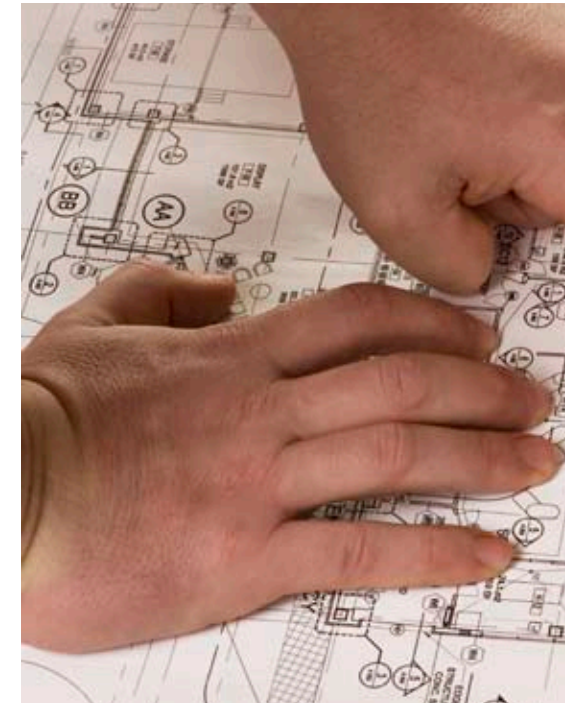

- » Consulting
- » Installation
- » Service and maintenance

Complete Equipment and Content Solutions.

MDM Commercial Lodging offers a complete line of television systems, complemented with quality content, to meet all your lodging needs.

And our professional consultation and installation helps you gain operational efficiencies and increases guest satisfaction.

- » Television systems
- » All necessary headend equipment
- » High quality DirecTV content with over 130 HD channels

Consulting. Installation. Service.

All in One Complete Package.

MDM Commercial Lodging provides a variety of consulting services for lodging facilities of 150 rooms and over. Before every project begins, MDM's technical staff works with you to assess your needs and capabilities in order to develop customized and comprehensive solutions that meet your specific goals. MDM offers comprehensive system planning, custom installation and centralized management so you get a system that is certified to function optimally.

MDM has the in-depth staff experience to:

- » Design and build RF distribution to carry digital and high-definition signals
- » Provide proper device selection to ensure compatibility with high-definition video content technology
- » Review and upgrade your facility's infrastructure as required for high-definition programming
- » Provide proper installation and configuration of hardware to ensure effective performance and high quality experience
- » Test and evaluate network and devices after installation to verify system performance
